

Training programme 2017/18

Cupar CARS/THI is delighted to announce a programme of training courses for 2017/18. The training is designed around the specific needs of traditional buildings in Cupar and its surrounding towns and villages. The courses, delivered by multidisciplinary teams of experienced and respected craftspeople and consultants, are intended to address real issues and problems faced by building contractors, professionals and homeowners in maintaining and repairing traditional buildings.

All courses are fully-funded through Cupar CARS/THI. Places are limited and must be booked in advance. Please contact Katy Mac Gregor for more information and to book your place (Katy.MacGregor@fife.gov.uk)
